Subject index

Academic department, A postgraduate course in Primary and Community Care: impact on an academic department 303
Accreditation, Assessment and accreditation of Mexican medical schools 319
Adaptation, American medical students in Israel 445
AIDS
  Junior doctors and HIV - are they aware? 461
  Training medical students in HIV/AIDS test counselling: results of a randomized trial 134
Altruism, 'Cultural imperialism': a danger? *editorial* 3
Anatomy, Ultrasound anatomy: a practical teaching system in human gross anatomy 296
Angoff methodology, The passing score in the Objective Structured Clinical Examination 345
Assessment
  ASME Workshop on Assessment, 8 December 1995 at the Queen Mary & Westfield College, London, report 463
  Assessment and accreditation of Mexican medical schools 319
  Assessment of student learning using the 'missing link technique' 76 *P*
  Content specificity and oral certification examinations 56
  Performance-based assessment in continuing medical education for general practitioners: construct validity 339
  The effects of the introduction of a system of mandatory formative assessment for general practice trainees 60
Association for the Study of Medical Education
  Annual Meeting, September 1995, abstracts 71
  ASME Workshop on Assessment, 8 December 1995 at the Queen Mary & Westfield College, London, report 463
Attitude
  Attitudes of patients to medical student participation: general practice consultations on the Cambridge Community-Based Clinical Course 14
  Attitudes to and knowledge about elderly people: a comparative analysis of students of Medicine, English and Computer Science and their teachers 221
  Dental and life science students: comparison of approaches to study and course perceptions 453
  Disease prevention and health promotion: a study of medical students and teachers 97
  European medical schools and tobacco 424
  Gender in medicine: the views of first and fifth year medical students 246
  Knowledge and attitudes about smoking in medical students before and after a tobacco seminar 290
  Learning preference and personality type: their association in paediatric residents 307
  Medical school entrance and career plans of Malaysian medical students 418
  Medical students' perceptions of medical malpractice 253
  Self-marking in written examination: a way of feedback and learning 322
  The Medical Student Expectation Scale (MSES): a device for measuring students' expectations of each others' values and behaviours 187
  Traditional vs. flexible programmes: training in family and community medicine 385
  Tutoring in problem-based learning: perceptions of teachers and students 371
  Voluntary active euthanasia and doctor-assisted suicide: knowledge and attitudes of Dutch medical students 428
Audit
  An audit of compliance with clinical teaching agreements in medicine and surgery 74 *abst*
  Clinical audit training for medical students 77 *P*
Australia, Teaching colloquial Australian English to medical students from non-English speaking backgrounds 412

Biological sciences, Dental and life science students: comparison of approaches to study and course perceptions 453

Calcium metabolism, The use of computer simulation in the teaching of disorders of calcium metabolism 75 *P*
Calgary-Cambridge Referenced Observation Guides, The Calgary-Cambridge Referenced Observation Guides: an aid to defining the curriculum and organizing the teaching in communication training programmes 83
Cambridge Community-Based Clinical Course, Attitudes of patients to medical student participation: general practice consultations on the Cambridge Community-Based Clinical Course 14
Canada, Evaluating communications skills in the objective structured clinical examination format: reliability and generalizability 38
Career choice
  Butcher, baker, candlestick-maker or maybe ... a doctor! 73 *abst*
  Choices of careers in medicine: some theoretical and methodological issues: *editorial* 157
  Gender in medicine: the views of first and fifth year medical students 246
  Medical school entrance and career plans of Malaysian medical students 418
  Specialty choice and understanding of primary care among Japanese medical students 378
Causes of death, Medical education in community sites: *editorial* 81
Changes, Generally applicable competences: *correspondence* 466
Clerkship
  Competency-based learning in neonatology 440
  Context in medical education: the informal ethics curriculum 353
  The surgical clerkship: characteristics of the effective teacher 18
Clinical audit training, Clinical audit training for medical students 77 *P*
Clinical clerkship
  Competency-based learning in neonatology 440
  Context in medical education: the informal ethics curriculum 353
Clinical competence
  A multi-format Interdisciplinary Final Examination 259
  An international comparison of knowledge levels of medical students: the Maastricht Progress Test 239
  Competency-based learning in neonatology 440
  Consulting skills training and medical students' interviewing efficiency 121
  Evaluating communications skills in the objective structured clinical examination format: reliability and generalizability 38
  Examining the ear: clinical teaching 299
  Junior doctors and HIV - are they aware? 461
  Performance-based assessment in continuing medical education for general practitioners: construct validity 339
  Smoking history-taking skills: a simple guide to teach medical students 283
  Teaching the teachers - a needs assessment of tutors for a new clinical skills course 208
  The Linköping curriculum: the phase examination in general practice 326
  The passing score in the Objective Structured Clinical Examination 345
  Where should special attention be paid in undergraduate medical education? Two surveys among Finnish doctors 31
Clinical medicine, Teaching and learning clinical perception 90
Colloquial English, Teaching colloquial Australian English to medical

students from non-English speaking backgrounds 412
Communication
Communication skills: *editorial* 316
Consulting skills training and medical students' interviewing efficiency 121
Evaluating communications skills in the objective structured clinical examination format: reliability and generalizability 38
The Calgary-Cambridge Referenced Observation Guides: an aid to defining the curriculum and organizing the teaching in communication training programmes 83
Community care (medicine)
A postgraduate course in Primary and Community Care: impact on an academic department 303
Clinical epidemiology: an experiment in student-directed learning in Western Australia 266
Medical education in community sites: *editorial* 81
Orienting medical education to community need: a review 163
Traditional vs. flexible programmes: training in family and community medicine 385
Community health centres, Attitudes of patients to medical student participation: general practice consultations on the Cambridge Community-Based Clinical Course 14
Compliance with clinical teaching agreements, An audit of compliance with clinical teaching agreements in medicine and surgery 74 *abst*
Computers
A closer look at cueing effects in multiple-choice questions 44
Computerized long-menu questions as an alternative to open-ended questions in computerized assessment 50
Information Management and Technology (IM&T): training provision in postgraduate medical education 367
Survey of the computer literacy of the staff in the medical faculty of the University of Glasgow 75 *P*
The use of computer simulation in the teaching of disorders of calcium metabolism 75 *P*
Conference, Leeds Undergraduate Medical Education Conference, 7-8 July 1995, report 153
Consulting skills, Consulting skills training and medical students' interviewing efficiency 121
Content specificity, Content specificity and oral certification examinations 56
Continuing medical education
A postgraduate course in Primary and Community Care: impact on an academic department 303
Continuing Medical Education Case Study Series. An innovative programme for general practitioners on malignant melanoma 226
From laggard to adopter 72 *abst*
Information Management and Technology (IM&T): training provision in postgraduate medical education 367
Performance-based assessment in continuing medical education for general practitioners: construct validity 339
Coping with change, Generally applicable competences: *correspondence* 466
Core content
A model undergraduate core curriculum in adult renal medicine 76 *P*
Consensus among experts for the core content of the undergraduate curriculum 74 *abst*
Counselling
Smoking history-taking skills: a simple guide to teach medical students 283
Training medical students in HIV/AIDS test counselling: results of a randomized trial 134
Cueing effects
A closer look at cueing effects in multiple-choice questions 44
Computerized long-menu questions as an alternative to open-ended questions in computerized assessment 50
Culture
American medical students in Israel 445
'Cultural imperialism': a danger? *editorial* 3
Teaching colloquial Australian English to medical students from non-English speaking backgrounds 412
Curriculum
A learning resources centre: its utilization by medical students 405
A model undergraduate core curriculum in adult renal medicine 76 *P*
A postgraduate course in Primary and Community Care: impact on an academic department 303
An information technology course in the medical curriculum 112
Back to the future - the history and philosophy of medicine experiment at Sydney University 349
Competency-based learning in neonatology 440
Consensus among experts for the core content of the undergraduate curriculum 74 *abst*
Context in medical education: the informal ethics curriculum 353
Crafting cases for problem-based learning: experience in a neuroscience course 24
Dental and life science students: comparison of approaches to study and course perceptions 453
Medical education in the Russian Federation 460
Non-cognitive characteristics of medical students: entry to problem-based and lecture-based curricula 179
Orienting medical education to community need: a review 163
Problems for problem-based learning: a comparative study of documents 272
Staff development of tutor skills for problem-based learning 365
Teaching the teachers - a needs assessment of tutors for a new clinical skills course 208
Team roles in curriculum development: a barrier to change? 71 *abst*
The Calgary-Cambridge Referenced Observation Guides: an aid to defining the curriculum and organizing the teaching in communication training programmes 83
The essential role of the student in curriculum planning 9
The Linköping curriculum: the phase examination in general practice 326
Traditional vs. flexible programmes: training in family and community medicine 385
Where should special attention be paid in undergraduate medical education? Two surveys among Finnish doctors 31

Day surgery centre, Teaching in a day surgery centre adapting surgical teaching to changes in clinical practice 71 abst
Death certificates, Death certification: production and evaluation of a training video 434
Dental education, The use of student journals in problem-based learning 105
Dentistry, Dental and life science students: comparison of approaches to study and course perceptions 453
Diagnosis, Teaching and learning clinical perception 90
Disease prevention, Disease prevention and health promotion: a study of medical students and teachers 97
Drug prescribing, Educational intervention on therapeutics in primary care 75 *P*
Drug therapy, Interprofessional clinical education of medical and pharmacy students 129

Ear, Examining the ear: clinical teaching 299
Educational measurement, Final examination performance of medical students from ethnic minorities 195
Efficacy, The need for more efficacy and relevance in medical education: *editorial* 235
Elderly people, Attitudes to and knowledge about elderly people: a comparative analysis of students of Medicine, English and Computer Science and their teachers 221
Electronic study guide, LETSGO: an electronic study guide about oncology for medical students 76 *P*
Epidemiology, Clinical epidemiology: an experiment in student-directed learning in Western Australia 266
Ethics, medical
Context in medical education: the informal ethics curriculum 353
The Medical Student Expectation Scale (MSES): a device for measuring

students' expectations of each others' values and behaviours 187
Ethnic groups, Final examination performance of medical students from ethnic minorities 195
Europe
European medical schools and tobacco 424
Survey of surgical training in Europe 201
